CO₂-EOR Targets Production

- **Leading the development of CCUS in Wyoming and providing expert technical support for CO₂-EOR**
- **CO₂ pipeline database & support for the Wyoming Pipeline Corridor Initiative**
- **Reservoir and geologic characterization to improve recovery of oil and gas from Wyoming fields**
- **Upside potential ~\$6 billion in State tax revenue from future IOR/EOR projects**
 - Secondary ~330 million barrels of oil
 - Tertiary ~700 million barrels of oil
- **Researching solutions for issues facing the oil & gas industry**

Contributions to Wyoming

EORI projects have generated ~40 million barrels of additional oil production and \$270 million in associated tax revenues for the State

Partnerships

Federal Research
Industry Legislative
Local State

Current Projects

Reservoir/Field Studies
DOE-Funded Research
EOR/IOR Method Evaluations

Technology Testing

Field Tested over
35 technologies
